

# Areas of Landslides Wahpeton Quadrangle, North Dakota

**Benjamin C. York  
&  
Levi D. Moxness**

**2023**

## UNIT DESCRIPTIONS

### QUATERNARY SYSTEM

#### RECENT/PLEISTOCENE

Area Not Mapped

**Qlsa** Areas of Recently Active Landslides

Landslide areas showing movement between 2008 and 2020.

**Qls** Landslide Deposits

A mass of material that has moved downslope. Includes earth flows, slumps, and areas of soil creep.

Landslides identified on this quadrangle were mapped from stereo pairs, black and white 1:20,000 scale aerial photographs flown in July 1957 by the United States Department of Agriculture (USDA). Additional data sources include digital orthophotography from the USDA National Agriculture Imagery Program (NAIP) flown in August 2021 and the North Dakota Geological Survey LiDAR Map Series, which compiles raw data flown in November 2020 to April 2021 from the North Dakota State Water Commission.

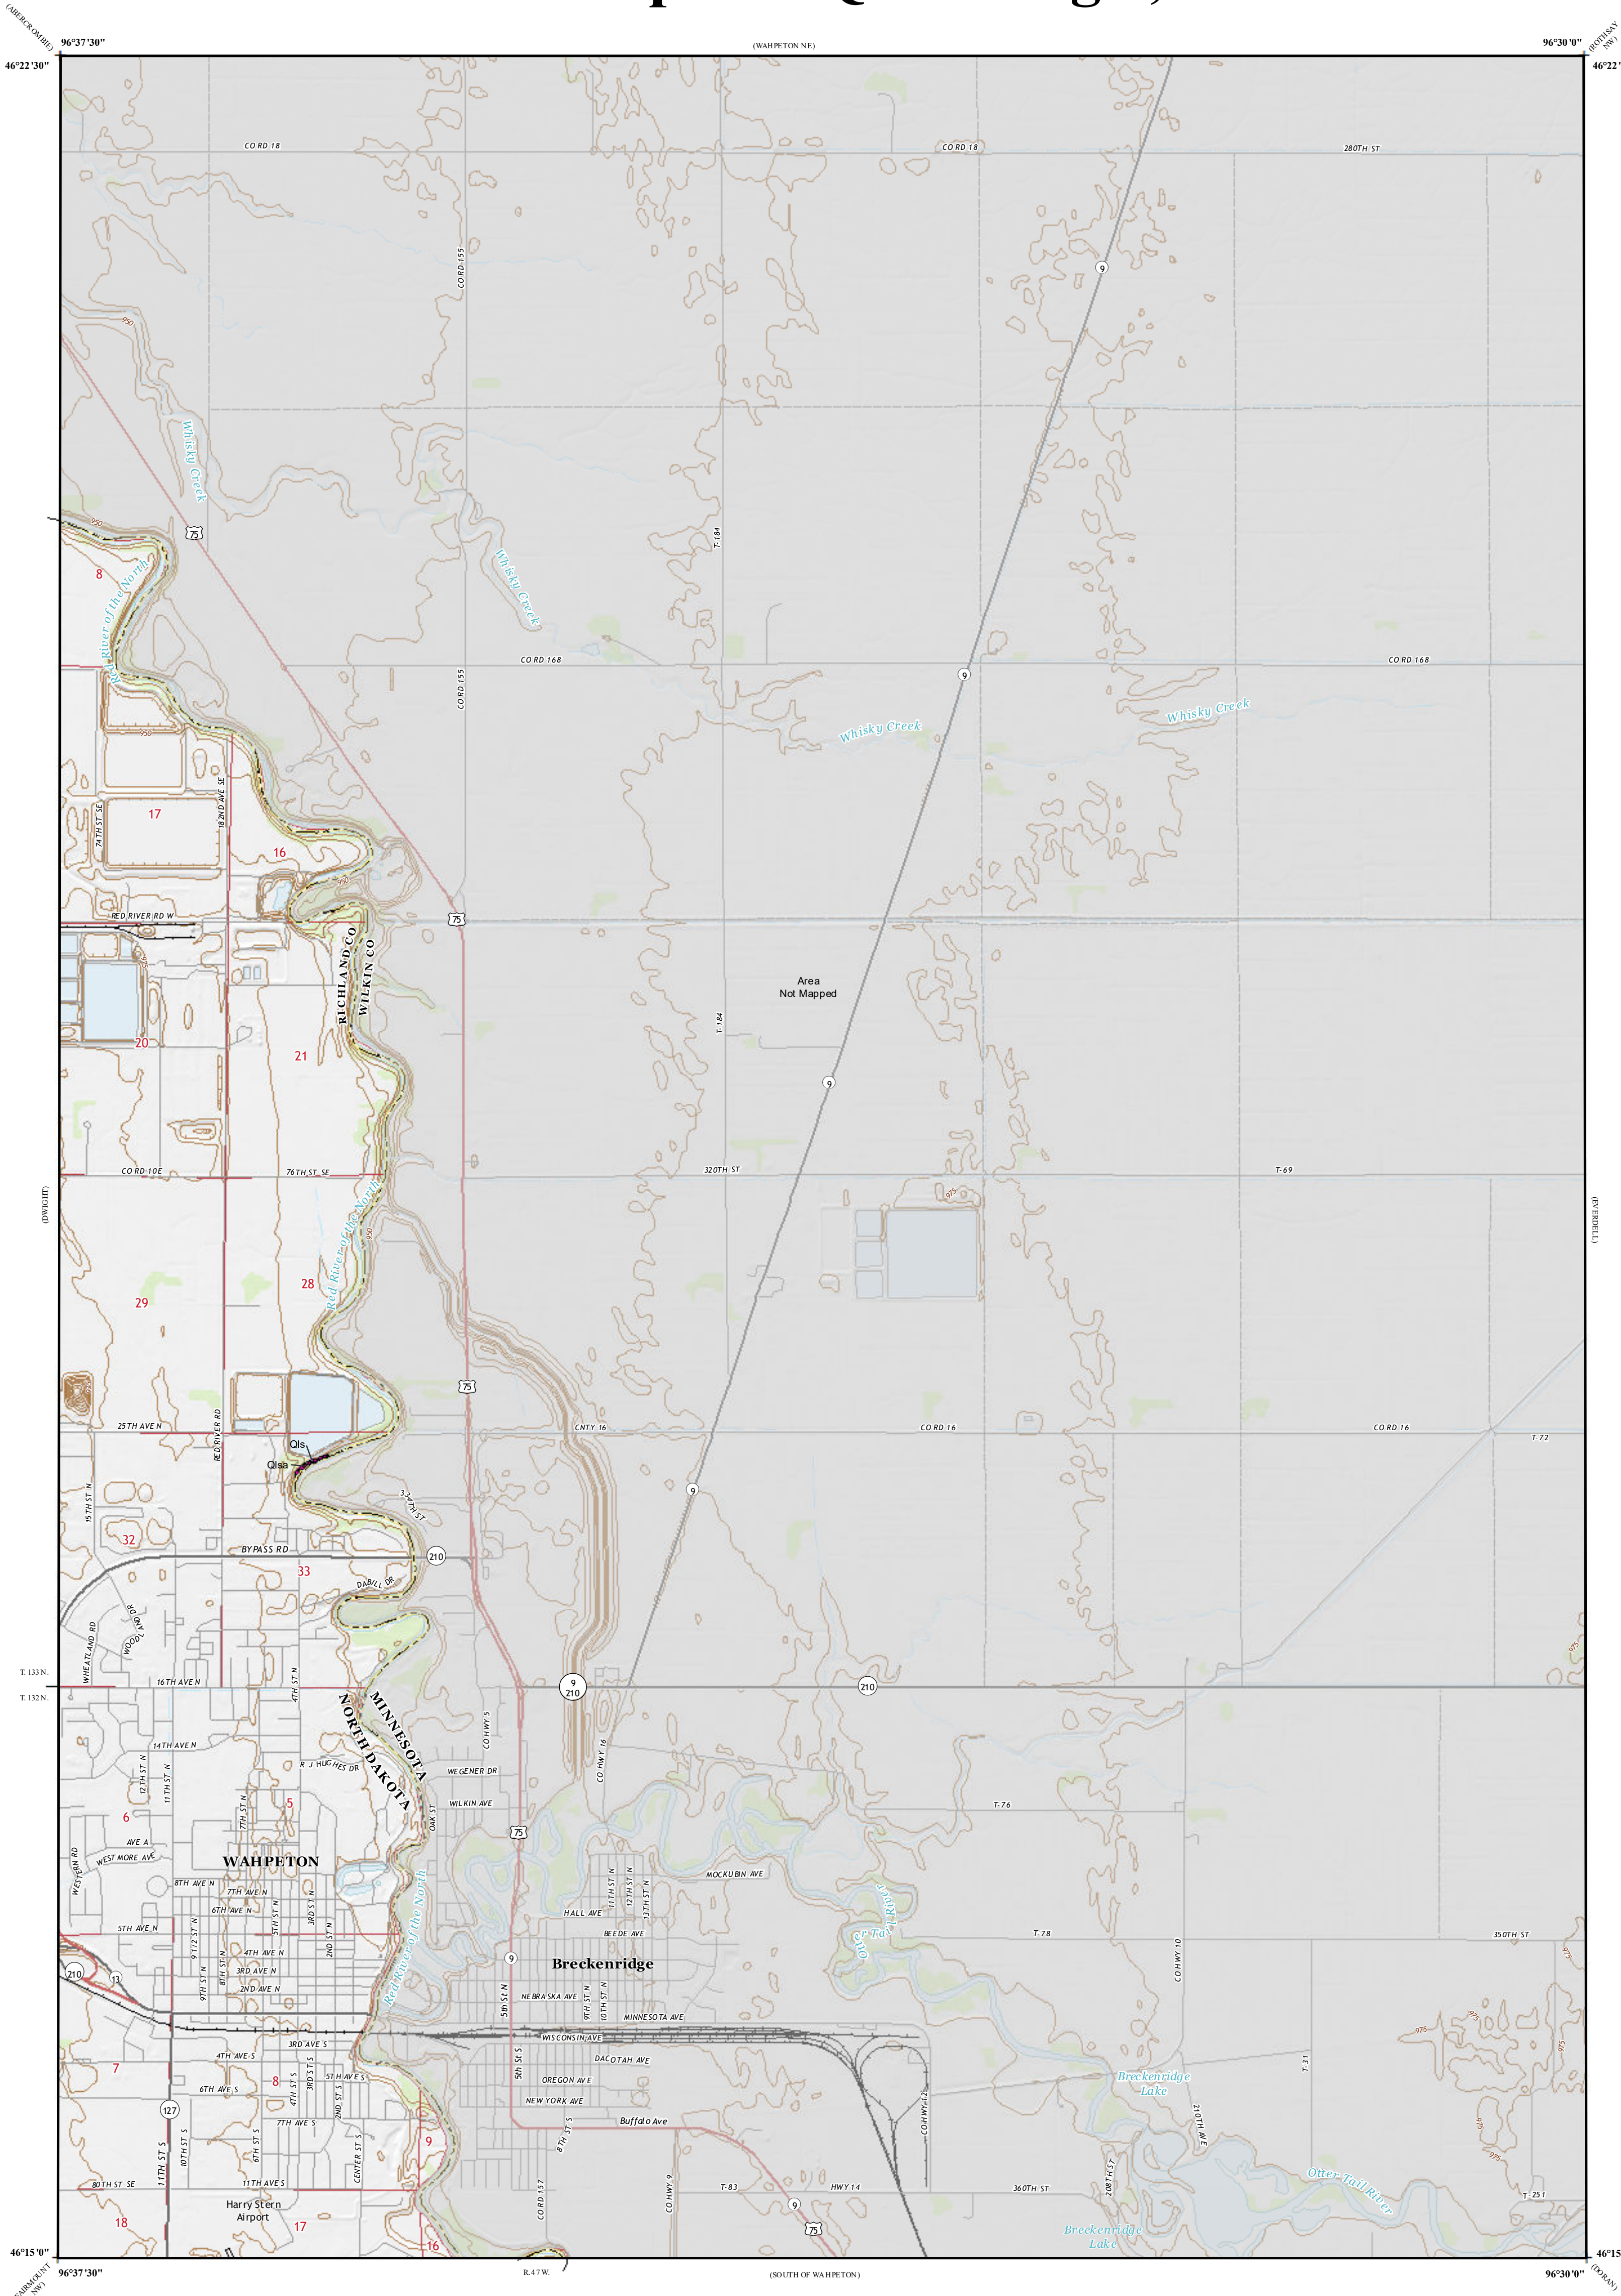

Areas of recently active landslides (Qlsa) mapped on this quadrangle were identified from changes between the 2008 and 2021 LiDAR elevation datasets observed on an elevation subtraction raster. Noise introduced from data precision (typically within a foot between the LiDAR datasets) is removed on this raster by excluding the signal from elevation change in the +/- 1 foot interval. Geologists interpret areas of landslide movement in geomorphic context (typically a decrease in elevation near a landslide headscarp paired with an increase in elevation downslope near the toe) and delineate those areas within the larger landslide dataset. Landslides not identified as recently active may have also experienced movement relatively recently, but did not show discernible signs of movement during the 2008 to 2021 window between LiDAR collects.

### ROAD CLASSIFICATION

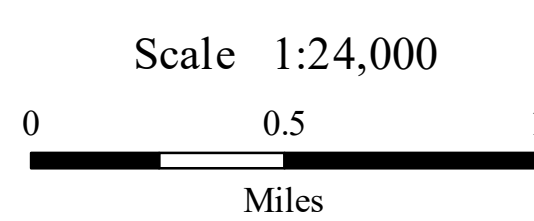

Expressway      Local Connector  
Secondary Hwy      Local Road  
Ramp      4WD  
Interstate Route      US Route      State Route

Map Unit	No. of Landslides	Mapped Landslide Area		Map Area %
		acres	m <sup>2</sup>	
Total Landslides (Qls & Qlsa)	3	1	3,745	0.002
Recently Active Landslides (Qlsa)	1	1	3,076	0.002

*82% of the mapped landslide area was active between 2008 and 2021*
