BEFORE THE INDUSTRIAL COMMISSION

OF THE STATE OF NORTH DAKOTA

CASE NO. 7145 ORDER NO. 8341

IN THE MATTER OF A HEARING CALLED ON A MOTION OF THE COMMISSION TO CONSIDER THE APPLICATION OF LYCO OPERATING COMPANY FOR AN ORDER ESTABLISHING 320-ACRE TEMPORARY SPACING FOR THE DEVELOPMENT OF AN OIL AND/OR GAS POOL IN THE INTERLAKE FORMATION UNDERLYING THE SE/4 OF SECTION 24, AND THE NE/4 OF SECTION 25, T.161N., R.99W., DIVIDE COUNTY, NORTH DAKOTA, DISCOVERED BY APPLICANT'S #25-2 PLUMER-LUNDQUIST WELL, AND ENACTING SUCH SPECIAL FIELD RULES AS MAY BE NECESSARY AND/OR ADVISABLE.

ORDER OF THE COMMISSION

THE COMMISSION FINDS:

(1) This cause came on for hearing at 9:00 a.m. on the 16th day of September, 1998.

(2) Counsel for the applicant, Lyco Operating Company, requests that this case be continued to the regularly scheduled hearing on October 21, 1998.

(3) There were no objections to said request.

(4) This case should be continued to the regularly scheduled hearing on October 21, 1998.

IT IS THEREFORE ORDERED:

(1) This case is hereby continued to the regularly scheduled hearing on October 21, 1998.

Dated this 15th day of October, 1998.

INDUSTRIAL COMMISSION STATE OF NORTH DAKOTA By the Director, on behalf of the Commission. /s/ Lynn D. Helms, Director

Re: Supplemental Testimony Re: Flaring -- Lyco Operating Company - Case No. 7145

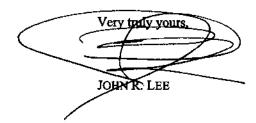

Dear Bruce:

Further to your request at the October 21, 1998 hearing of the captioned, attached hereto is the response of Brian Wright to your inquiry regarding possible future commingling of the Interlake and Red River formations, and the effect thereof on the economics presented in support of a flaring exemption under the field rules to be put in place by the Commission, as well as an exception to the provisions of Section 38-08-06.4 of the North Dakota Century Code. As stated in Mr. Wright's letter, pressure data indicates the Interlake and Red River formations will exhibit cross-flow if commingled, and therefore Lyco has no intentions of attempting such an operation. Further, although not mentioned in Mr. Wright's letter, Lyco anticipates the well will need to go on pump within six months. At such time, lease gas usage will increase as the pumping unit will be powered by casinghead gas, thus decreasing the amount of daily salable gas with a concomitant decrease in the gas value reflected in the "Gas Flaring Exemption Data" exhibit submitted in Case No. 7145.

In view of the data submitted at hearing and this supplemental information, Lyco believes that both a flaring exemption under the pending field rules and an exception to the provisions of Section 38-08-06.4 NDCC are warranted. As I mentioned at the hearing, however, I had some concerns over proper notice having been given regarding these flaring requests, with Charles Carvell indicating that he would look into the matter. If he determines that these matters must be "re-noticed" and advertised for hearing, I would appreciate your giving consideration to merely incorporating the flaring testimony adduced in this Case No. 7145 into the new case by reference.

North Dakota Industrial Commission October 27, 1998 Page 2

Thank you for your assistance. My understanding is that the original of Brian Wright's letter will be forwarded directly to you from Lyco by overnight courier. If you have any questions, please feel free to contact the undersigned at your convenience.

LYCO OPERATING COMPANY

Brian J. Wright Project Engineer

Industrial Commission Of North Dakota, Oil and Gas Division 900 E Blvd. Bismarck, ND 58505

Gentlemen:

Re: Case # 7145, October, 20, 1998

In response to Red River "C" gas production potential questions regarding Case #7145, Lyco Operating Company submits the following information.

The Red River "C" zone was initially on production in late February of 1998. Production declined rapidly and sait water production began to increase. A 500 gallon acid cleanup resulted in a marginally economic operation in the Red River "C" which produced 48 BO, 204 BSW, and flared an estimated 40-45 MCF of gas on the last day of Red River "C" production, June 11, 1998. The Red River was subsequently isolated behind a bridge plug and the Interlake zone was perforated and is the current producing interval.

Reservoir pressures recorded during pressure build up testing indicates that the Interlake (4,920 psi @ 10,471' datum or.469 psi/ft gradient [on 9/21/98]) and the Red River (5,180 psi @ 11,267' datum or 0.459 psi/ft gradlent [on 2/16/98]) will exhibit cross flow if co-mingled due to a very strong water drive in the Interlake. This strong water drive is confirmed by no decline in the original DST BHP, after over 90 days of production.

For the above reason, Lyco will make no attempt to co-mingle the production between the Interlake and the Red River zones in the Plumer-Lundquist #25-2. Current plans are to produce the Interlake until it becomes unprofitable, then evaluate additional shallower potential.

Page 2

Clarification of an additional point has been requested regarding the gas bid tendered for the subject well. The original bid was submitted by Custom Energy of Casper, Wyoming from which the installation costs and gas prices submitted were obtained. The actual gas volume test was conducted by Amerada Hess which declined to submit a bid due to limited available volumes.

Please contact me at the below address with any questions.

Regards,

peling Brin

Re: Case No. 7145 - September 16, 1998 Docket -- Lyco Operating Company

Dear Ms. Fine:

On behalf of Lyco Operating Company, I would respectfully request that the captioned case for hearing on temporary spacing be continued until the Commission's regularly-scheduled docket in October, 1998. The basis for this request is that Lyco has been experiencing mechanical difficulties with the Plumer-Lundquist #25-2 well, and wishes to stabilize production rates and acquire more meaningful production data prior to the hearing on Case No. 7145, which has been noticed for September 16, 1998.

Thank you for your consideration of our request. If you have any questions, please feel free to contact the undersigned at the letterhead address.

Very traiy yours. JOHN R. LEE

Case No. 7145) September 16. 1998 Docket -- Lyco Operating Company

Dear Ms. Fine:

cc:

On behalf of Lyco Operating Company, I would respectfully request that the captioned case for hearing on temporary spacing be continued until the Commission's regularly-scheduled docket in October, 1998. The basis for this request is that Lyco has been experiencing mechanical difficulties with the Plumer-Lundquist #25-2 well, and wishes to stabilize production rates and acquire more meaningful production data prior to the hearing on Case No. 7145, which has been noticed for September 16, 1998.

Thank you for your consideration of our request. If you have any questions, please feel free to contact the undersigned at the letterhead address.

Very traily yours JOHN R. LEE

Mr. Jim Hyink Mr. Lynn D. Helms Mr. F.E. (Jack) Wilborn Mr. Bruce E. Hicks

BEFORE THE INDUSTRIAL COMMISSION OF THE STATE OF NORTH DAKOZA 23456

IN THE MATTER OF THE APPLICATION OF LYCO OPERATING COMPANY FOR AN ORDER OF THE COMMISSION ESTABLISHING 320-ACRE TEMPORARY SPACING FOR THE DEVELOPMENT OF AN OIL AND/OR GAS POOL IN THE INTERLAKE FORMATION UNDERLYING THE SE/4 OF SECTION 24, AND THE NE/4 OF SECTION 25, TOWNSHIP 161 NORTH, RANGE 99 WEST, 5TH P.M., DIVIDE COUNTY, NORTH DAKOTA, DISCOVERED BY APPLICANT'S #25-2 PLUMER-LUNDQUIST WELL, AND ENACTING SUCH SPECIAL FIELD RULES AS MAY BE NECESSARY AND/OR ADVISEABLE.

î

AUG1998 RECEIVED ND OIL & GAS DIVISION

APPLICATION OF LYCO OPERATING COMPANY

COMES NOW the applicant, LYCO OPERATING COMPANY ("Lyco"), 6688 North Central Expressway, Suite 1600, Dallas, Texas 75206-3927, and respectfully states as follows:

1.

That Lyco is the owner of an interest in the oil and gas leasehold estate underlying the SE/4 of Section 24, and the NE/4 of Section 25, Township 161 North, Range 99 West, 5th P.M., Divide County, North Dakota, and its #25-2 Plumer-Lundquist well has resulted in the commercial discovery of oil and associated natural gas in the Interlake formation underlying said lands.

2.

Industrial Commission Order No. 8231 established the SE/4 of Section 24, and the NE/4 of Section 25, Township 161 North, Range 99 West, 5th P.M., Divide County, North Dakota, as a 320-acre drilling unit for the purpose of drilling an Interlake formation test well therein. All owners in said drilling unit have voluntarily pooled their interests for the development of the unit.

3.

Applicant's interpretation of geological and geophysical data indicates that the Interlake formation underlying said lands should be developed on a pattern of one well to 320 acres in order to drain efficiently the recoverable oil from said formation, assure rapid development, avoid the drilling of unnecessary wells, and prevent waste in a manner that will protect correlative rights. Applicant further believes that creation of a 320-acre temporary spacing unit comprised of the SE/4 of Section 24, and the NE/4 of Section 25, Township 161 North, Range 99 West, 5th P.M., would honor its interpretation of the geological and geophysical data regarding the location of the Interlake formation underlying said lands.

4.

There are no unleased mineral owners in the SE/4 of Section 24, or the NE/4 of Section 25, Township 161 North, Range 99 West, 5th P.M., Divide County, North Dakota. WHEREFORE, Lyco respectfully requests that this matter be set for hearing at the regularly scheduled hearings in September, 1998, and that thereafter the Commission enter its order granting the relief requested.

DATED this 4th day of August, 1998.

LYCO OPERATING COMPANY

CROWLEY, HAUGHEY, HANSON, TOOLE & DIETRICH P.L.L.P.

BEFORE THE INDUSTRIAL COMMISSION

OF THE STATE OF NORTH DAKOTA

CASE NO. 7145 (CONTINUED) ORDER NO. 8351

IN THE MATTER OF A HEARING CALLED ON Α MOTION OF THE COMMISSION ΤO CONSIDER THE APPLICATION OF LYCO OPERATING COMPANY FOR AN ORDER ESTABLISHING 320-ACRE TEMPORARY SPACING FOR THE DEVELOPMENT OF AN OIL AND/OR GAS POOL IN THE INTERLAKE FORMATION UNDERLYING THE SE/4 OF SECTION 24, AND THE NE/4 OF SECTION 25, T.161N., R.99W., DIVIDE COUNTY, NORTH DAKOTA, DISCOVERED BY APPLICANT'S #25-2 PLUMER-LUNDQUIST WELL, AND ENACTING SUCH SPECIAL FIELD RULES AS MAY NECESSARY BE AND/OR ADVISABLE.

TEMPORARY ORDER OF THE COMMISSION

THE COMMISSION FINDS:

(1) This cause came on for hearing at 9:00 a.m. on the 21st day of October, 1998.

(2) The record was left open until October 28, 1998 for the submission of additional evidence.

(3) Geological and engineering evidence presented to the Commission relative to the matter of well spacing indicates that the Burg-Silurian Pool, as classified and defined in this order, should be developed on a pattern of one well to 320 acres in order to drain efficiently the recoverable oil from said pool, assure rapid development, avoid the drilling of unnecessary wells, and prevent waste in a manner that will protect correlative rights.

(4) Temporary 320-acre spacing in the Silurian Pool in this field will result in the efficient and economical development of the field as a whole and will operate so as to prevent waste and provide maximum ultimate recovery, will avoid the drilling of unnecessary wells, and will protect correlative rights.

(5) The unrestricted flaring of gas produced from the Burg-Silurian Pool could be considered waste, and in order to minimize such, production

Case No. 7145 (Continued)

Order No. 8351

from the pool should be restricted until the wells producing therefrom are connected to a gas gathering and processing facility.

(6) Certain special field rules are necessary to prevent waste and protect against the contamination and pollution of surface lands and fresh waters.

IT IS THEREFORE ORDERED:

(1) The following described tracts of land in Divide County, North Dakota, be, and the same are hereby redesignated the Burg Field:

TOWNSHIP 161 NORTH, RANGE 99 WEST, 5TH PM THE SE/4 OF SECTION 24 AND THE NE/4 OF SECTION 25,

together with those additional quarter sections or governmental lots corresponding thereto as may be proven productive by wells drilled on lands within one mile of the boundaries of the field as set forth above, provided further that such extensions of the field boundaries shall include only sufficient acreage to form a spacing unit for such wells, and any intervening lands.

(2) The Burg-Silurian Pool be, and the same is hereby defined as that accumulation of oil and gas found in the interval from below the base of the Ashern Formation to above the top of the Middle Member of the Interlake Formation within the limits of the field as set forth above.

(3) Effective this date, the temporary spacing for the development of the Burg-Silurian Pool be, and the same is hereby set at one well to 320 acres.

(4) All wells hereafter drilled to said pool shall be located not less than 660 feet from a spacing unit boundary nor closer than 1980 feet to a well permitted to or producing from the pool. Wells presently permitted to or producing from the pool that do not conform to this spacing pattern shall be considered exceptions.

(5) The SE/4 of Section 24 and the NE/4 of Section 25, Township 161 North, Range 99 West, Divide County, North Dakota, is designated a 320-acre spacing unit for the Burg-Silurian Pool.

(6) Spacing units in the Silurian Pool in the Burg Field shall consist of two adjacent quarter sections, or governmental lots corresponding thereto within the same section. The configuration of spacing units, either standup or laydown, shall be determined by the location of the first well in the section, such that the aforesaid well will be nearest to the center of the spacing unit. Spacing units for wells being equi-distant from the mid-section lines shall be designated by the operator; however, the Commission shall have continuing jurisdiction, and in the event that spacing units hereafter formed by this policy do not coincide with the geological and physical nature of the reservoir, the Commission may alter specific spacing units upon application by any interested party, after due notice and hearing.

Case No. 7145 (Continued) Order No. 8351

(7) No well shall be drilled hereafter in the Burg-Silurian Pool except in conformity with the regulations above without special order of the Commission after due notice and hearing.

(8) The following rules concerning the casing, tubing and equipping of the wells shall apply to the subsequent drilling and operation of wells in the Burg-Silurian Pool:

- The surface casing shall consist of new or reconditioned pipe (a) that has been previously tested to 1000 pounds per square The casing shall be set and cemented at a point not inch. less than 50 feet below the base of the Fox Hills Formation. Sufficient cement shall be used to fill the annular space outside the pipe to the surface of the ground. or the bottom of the cellar, and sufficient scratchers and centralizers shall be used to assure a good cement job. Cement shall be allowed to stand a minimum of 12 hours before drilling the plug or initiating tests. The quality of cement shall conform to the standards provided under North Dakota Administrative Code (NDAC) Section 43-02-03-21;
- (b) The producing or oil string shall consist of new or reconditioned pipe that has been previously tested to 2000 pounds per square inch. Casing shall be set and cemented at a point not higher than the top of the producing formation, or at a point approved by the Director. Sufficient cement shall be used and applied in such manner as adequately protect isolate to and all formations containing oil and/or gas, protect the pipe through salt sections encountered, and to isolate the Dakota-Lakota Series. The cement shall be allowed to stand a minimum of 15 hours before drilling the plug or initiating tests. The quality of cement shall conform to the standards provided under NDAC Section 43-02-03-21. After cementing, the casing shall be tested by application of pump pressure of at least 2000 pounds per square inch. If, at the end of 30 minutes this pressure has dropped 150 pounds per square inch or more, the casing shall be repaired. Thereafter, the casing shall again be tested in the same manner. Further work shall not proceed until a satisfactory test has been obtained:
- (c) All well-head fittings and connections shall have a working pressure in excess of that to which they are expected to be subjected; and,
- (d) All wells shall be equipped with tubing and all flowing wells shall be equipped with tubing and tubing packer; all tubing shall be of sufficient internal diameter to allow the passage of a bottom hole pressure gauge for the purpose of obtaining bottom hole pressure measurements.

(9) The gas-oil ratio of each well shall be measured during the months of May and November, and the reservoir pressure of flowing wells shall be measured in the months of May and November, and in pumping wells when the rods are pulled but at least once annually and reported to

Case No. 7145 (Continued) Order No. 8351

the Commission within 15 days following the end of the month in which they are determined. Pressure measurements shall be made at or adjusted to a subsea datum of 8320 feet after the well has been shut in for 48 hours. All gas-oil ratios and reservoir pressure determinations shall be made by methods approved by the Director. The Director is authorized to waive these requirements if the necessity therefore can be demonstrated to his satisfaction.

(10) No salt water, drilling mud, crude oil or waste oil shall be stored in pits in this field, except in an emergency, and approved by the Director.

(11) For the purposes of division of production to owners of interests in spacing units established by this order, and proven productive prior to the date hereof, this order shall be retroactive to the date of first production.

(12) All wells in the Burg-Silurian Pool shall be allowed to produce at an unrestricted rate for a period of 60 days commencing on the first day oil is produced through well-head equipment into tanks from the ultimate producing interval after casing has been run; after that, oil production from such wells shall not exceed an average of 200 barrels per day for a period of 60 days; after that, oil production from such wells shall not exceed an average of 150 barrels per day for a period of 60 days, thereafter, oil production from such wells shall not exceed an average of 100 barrels of oil per day; if and when such wells are connected to a gas gathering and processing facility the foregoing restrictions shall be removed, and the wells shall be allowed to produce at a maximum efficient rate.

(13) If the flaring of gas produced with crude oil from the Burg-Silurian Pool causes, or threatens to cause, degradation of ambient air quality, production from the pool shall be further restricted.

(14) This order shall cover all of the Burg-Silurian Pool, common source of supply of crude oil and/or natural gas as herein defined, and shall continue in full force and effect until the 31st day of May, 2000. That the proper spacing for the pool will be considered by the Commission on or before the regularly scheduled meeting in April, 2000.

Dated this 4th day of November, 1998.

INDUSTRIAL COMMISSION STATE OF NORTH DAKOTA

- /s/ Edward T. Schafer, Governor
- /s/ Heidi Heitkamp, Attorney General
- /s/ Roger Johnson, Commissioner of Agriculture

Brian J. Wright Project Engineer

Industrial Commission Of North Dakota, Oil and Gas Division 900 E Blvd. Bismarck, ND 58505

Gentlemen:

Re: Case # 7145, October, 20, 1998

In response to Red River "C" gas production potential questions regarding Case #7145, Lyco Operating Company submits the following information.

The Red River "C" zone was initially on production in late February of 1998. Production declined rapidly and salt water production began to increase. A 500 gallon acid cleanup resulted in a marginally economic operation in the Red River "C" which produced 48 BO, 204 BSW, and flared an estimated 40-45 MCF of gas on the last day of Red River "C" production, June 11, 1998. The Red River was subsequently isolated behind a bridge plug and the Interlake zone was perforated and is the current producing interval.

Reservoir pressures recorded during pressure build up testing indicates that the Interlake (4,920 psi @ 10,471' datum or 469 psi/ft gradient [on 9/21/98]) and the Red River (5,180 psi @ 11,267' datum or 0.459 psi/ft gradient [on 2/16/98]) will exhibit cross flow if co-mingled due to a very strong water drive in the Interlake. This strong water drive is confirmed by no decline in the original DST BHP, after over 90 days of production.

For the above reason, Lyco will make no attempt to co-mingle the production between the Interlake and the Red River zones in the Plumer-Lundquist #25-2. Current plans are to produce the Interlake until it becomes unprofitable, then evaluate additional shallower potential.

IN THE MATTER OF THE APPLICATION OF LYCO OPERATING COMPANY FOR AN ORDER OF THE COMMISSION ESTABLISHING 320-ACRE TEMPORARY SPACING FOR THE DEVELOPMENT OF AN OIL AND/OR GAS POOL IN THE INTERLAKE FORMATION UNDERLYING THE SE/4 OF SECTION 24, AND THE NE/4 OF SECTION 25, TOWNSHIP 161 NORTH, RANGE 99 WEST, 5TH P.M., DIVIDE COUNTY NORTH DAKOTA, DISCOVERED BY APPLICANT'S #25-2 PLUMER-LUNDQUIST WELL, AND ENACTING SUCH SPECIAL FIELD RULES AS MAY BE NECESSARY AND/OR ADVISEABLE.

CASE NO. 7145 AFFIDAVIT OF JAMES W. HYINK

LYCO OPERATING COMPANY, 6688 North Central Expressway, Suite 1600, Dallas, Texas 75206-3927:

STATE OF TEXAS § COUNTY OF DALLAS §

James W. Hyink being first duly sworn and says:

- 1. I am Landman for Lyco Energy Corporation and reside in Richardson, Texas. I have not testified before the North Dakota Industrial Commission. I have been qualified as an expert witness in the field of Petroleum Land Management in the states of Louisiana and Montana. Attached as Exhibit "A" is a resume of my work history and education.
- 2. Exhibit "A-I" (copy attached) as contained in the Exhibit Packet for Case No. 7145 was prepared under my direction and it is true and correct to the best of my knowledge and belief.
- 3. Exhibit "A-II" (copy attached) as contained in the Exhibit Packet for Case No. 7145 was prepared from detailed mineral and leasehold information from the records of Divide County, North Dakota by landmen under my direction. Mineral interest and leasehold ownership within the SE/4 of Section 24 and the NE/4 of Section 25, Township 161 North, Range 99 West, 5th P.M., Divide County, North Dakota, are set out in this Exhibit . As indicated on Exhibit "A-I", the ownership within this proposed spacing unit is not common.

onsulting Landmar

SUMMARY OF QUALIFICATIONS

- Experienced in all areas of exploration and development properties, reworks, farmins and farmouts
- Experienced in acquisitions, divestitures of development and exploration properties
- Experienced in all phases of negotiation of contracts for properties regarding drilling rights
- Experienced in all phases of managerial and supervisory phases of departmental goals and functions
- Excellent communication, motivation skills
- Excellent interpersonal skills

BUSINESS EXPERIENCE

6/98 to Present	LYCO ENERGY CORPORATION, Dallas, Texas Consulting Landman – Directing land activities in Montana and North Dakota, including acquisition of oil and gas leases, dealing with attorneys and brokers for title and curative, negotiating 3-D trade agreements, joint venture agreements, farmouts and other industry agreements, and coordinating various oil and gas
	commission hearings.
2/98 to 6/98	INDEPENDENT LANDMAN – Assisted Cross Timbers Oil Company in the due diligence phase of their acquisition of East Texas properties owned by Enserch Exploration, Inc.
11/92 to 2/98	ENSERCH EXPLORATION, INC., Dallas, Texas Manager, Land Development - Responsible for all producing properties operated and non-operated where Enserch has an interest. Work closely with District Production Managers

	in all areas of developed properties, including development drilling, reworks, farmins and farmouts, acquisitions and divestitures.
10/85 to 11/92	Land Manager - Responsible for all district land functions. Work closely with Exploration and Development Departments at the district level to coordinate the company goals in all phases of lease acquisition, curative, titles, negotiation and contracts, primarily in the East Texas area.
7/83 to 10/85	PENN RESOURCES, INC., Dallas, Texas Land Manager - Responsible for all department functions and coordination of Exploration/Land/Operations departments to ensure proper paper flow. Responsible for approving in- voices and signing checks. Worked closely with senior management as to future planning and strategy to meet company goals.
3/81 to 7/83	MOORE MCCORMACK ENERGY, INC., Dallas, Texas Land Manager - Responsible for land department/ exploration activity, including departmental approval of invoices, initiating AFEs, as well as managing daily departmental managerial and supervisory functions. Extensive work with management as to future planning, acquisitions, etc.
1/79 to 3/81	Senior Landman - Responsibilities included negotiations farmin/farmout agreements, operating agreements, con- tracts and assignments, unit designations, division orders, selling and acquiring drilling prospects, preparing manage- ment reports, negotiating damages, R.O.W. agreements, surface leases and Salt Water Disposal leases. Exten- sive work with staff Attorney and outside Counsel in the preparations and curing of drilling title opinions and division order title opinions.
1975 to 1979	SOUTHWESTERN GAS PIPELINE, INC., Dallas, Texas Landman - Responsibilities included negotiating farmin/ farmout agreements, supervising brokers, training of Jr. Landmen, handling royalty owner problems and working with Houston office in land pre-drilling preparations. Field work included lease acquisitions, title curative and damage negotiations, primarily in the Ft. Worth Basin area.

WHEREAS, by Assignment dated June 7, 1996 the above referenced oil and gas lease was assigned to Tipperary Oil & Gas Corporation ("Tipperary").

WHEREAS, the parties hereto agree that it is mutually desirable and advantageous that Tipperary be authorized to develop said lease by pooling it in the manner hereinafter provided.

NOW, THEREFORE, in consideration of the premises and other good and valuable consideration, Lessor hereto agrees as follows:

- Tipperary, its successor(s) and assign(s) are hereby granted the authority to pool said lease to form a pooled area which pooled area shall consist of the following lands:
 <u>T161N. R99W. Sec. 24: SE1/4 and Sec. 25: NE1/4</u>
- 2. The pooled area shall be developed and operated as an entirety as though the pooled area were covered by a single oil and gas lease executed by all persons owning interest therein.

For all purposes, production of the pooled substances shall 3. be allocated to and shall be deemed to have been produced from each of the separately owned tracts embraced within the pooled area in the proportion that the surface acreage of each such tract bears to the total surface acreage of the entire pooled area.

ながれたりないないないとうないがない

- Subject to the terms of this Pooling Agreement, said lease 4. shall continue in full force and effect as originally written.
- 5. This Agreement shall be binding upon and shall insure to the benefit of the parties to said oil, gas and mineral lease and their respective heirs, successors, legal representatives and assigns.

IN WITNESS WHERROF, this instrument is executed as of the <u>17</u> day of <u>September</u>, 19<u>97</u>.

County of <u>Divide</u>, State of North Dakota, which said lease is recorded in <u>Book 198M, page 629</u> of the <u>Divide</u> County Register of Deeds Records of said County and State, to which lease and the record thereof (hereinafter "said lease") reference is here made for all purposes; and

WHEREAS, by Assignment dated <u>September 19. 1997</u> the above referenced oil and gas lease was assigned to Tipperary Oil & Gas Corporation ("Tipperary").

WHEREAS, the parties hereto agree that it is mutually desirable and advantageous that Tipperary be authorized to develop said lease by pooling it in the manner hereinafter provided.

NOW, THEREFORE, in consideration of the premises and other good and valuable consideration, Lessor hereto agrees as follows:

- The pooled area shall be developed and operated as an entirety as though the pooled area were covered by a single oil and gas lease executed by all persons owning interest therein.

- 3. For all purposes, production of the pooled substances shall be allocated to and shall be deemed to have been produced from each of the separately owned tracts embraced within the pooled area in the proportion that the surface acreage of each such tract bears to the total surface acreage of the entire pooled area.
- Subject to the terms of this Pooling Agreement, said lease shall continue in full force and effect as originally written.
- 5. This Agreement shall be binding upon and shall insure to the benefit of the parties to said oil, gas and mineral lease and their respective heirs, successors, legal representatives and assigns.

IN WITNESS WHEREOF, this instrument is executed as of the ______ day of ______, 19_97_.
