

BEFORE THE INDUSTRIAL COMMISSION
OF THE STATE OF NORTH DAKOTA

CASE NO. 19501
ORDER NO. 21803

IN THE MATTER OF A HEARING CALLED ON A MOTION OF THE COMMISSION TO CONSIDER THE APPLICATION OF BAYTEX ENERGY USA LTD. FOR AN ORDER AUTHORIZING THE FLARING OF GAS FROM THE COLBY 23-14-160-99H #1PB, SWSE SECTION 23, T.160N., R.99W., DIVIDE COUNTY, ND, BURG-BAKKEN POOL, PURSUANT TO THE PROVISIONS OF NDCC § 38-08-06.4 AND SUCH OTHER RELIEF AS IS APPROPRIATE.

ORDER OF THE COMMISSION

THE COMMISSION FINDS:

- (1) This cause came on for hearing at 9:00 a.m. on the 17th day of January, 2013.
- (2) The Commission received an application from Baytex Energy USA Ltd. (Baytex) on December 14, 2012 for an order pursuant to North Dakota Administrative Code (NDAC) Section 43-02-03-88.1 authorizing the flaring of gas from the Colby 23-14-160-99H #1PB well located in the SW/4 SE/4 of Section 23, Township 160 North, Range 99 West, Burg-Bakken Pool, Divide County, North Dakota, pursuant to the provisions of North Dakota Century Code (NDCC) Section 38-08-06.4 and such other relief as is appropriate.
- (3) Pursuant to NDAC Section 43-02-03-88.1, the Director is authorized, on behalf of the Commission, to grant or deny applications relating to, inter alia, flaring exemptions under NDCC Section 38-08-06.4 and under NDAC Section 43-02-03-60.2.
- (4) At the time of this hearing, NDCC Section 38-08-06.4 stated:

As permitted under rules of the industrial commission, gas produced with crude oil from an oil well may be flared during a one-year period from the date of first production from the well. Thereafter, flaring of gas from the well must cease and the well must be capped, connected to a gas gathering line, or equipped with an electrical generator that consumes at least seventy-five percent of the gas from the well. An electrical generator and its attachment units to produce electricity from

gas must be considered to be personal property for all purposes. For a well operated in violation of this section, the producer shall pay royalties to royalty owners upon the value of the flared gas and shall also pay gross production tax on the flared gas at the rate imposed under section 57-51-02.2. The industrial commission may enforce this section and, for each well operator found to be in violation of this section, may determine the value of flared gas for purposes of payment of royalties under this section and its determination is final. A producer may obtain an exemption from this section from the industrial commission upon application and a showing that connection of the well to a natural gas gathering line is economically infeasible at the time of the application or in the foreseeable future or that a market for the gas is not available and that equipping the well with an electrical generator to produce electricity from gas is economically infeasible.

(5) At the time of this application, Baytex was the owner or operator of the following well in the Burg-Bakken Pool, Divide County, North Dakota:

<u>File #</u>	<u>Well Name & Number</u>	<u>Location</u>
20587	Colby 23-14-160-99H #1PB	SWSE Section 23-T160N-R99W

The Commission approved the transfer of the Colby 23-14-160-99H #1PB well from Baytex to SM Energy Company on November 21, 2014.

(6) The Colby 23-14-160-99H #1PB well was completed in the Burg-Bakken Pool on or around August 6, 2011. Pursuant to NDCC Section 38-08-06.4, gas produced with crude oil from an oil well may be flared during a one-year period from the date of first production from the well.

(7) The Burg-Bakken Pool is an oil reservoir, but gas is produced in association with the oil at the wellhead as a by-product of oil production.

(8) By previous order of the Commission, said well is currently authorized to flare so that all owners of interests in the well herein described may receive the maximum benefits of the oil production in such a manner that will prevent waste and protect correlative rights.

(9) At the time of the application gas pipeline infrastructure did not exist in and around the Burg Field, although Baytex anticipated the well could be connected to a gas gathering facility in the future. The Commission notes the well was connected to a gas gathering system in June 2014.

(10) Baytex submitted evidence that, at the time of their application, there was no market for the surplus casinghead gas being produced by the well.

(11) Baytex has investigated the possibility of equipping the well with an electrical generator and determined it is not economic to purchase, install, connect and operate an electric generator fueled by produced casinghead gas. The Commission concludes that equipping the well with an electrical generator to produce electricity from the gas is economically infeasible.

(12) If Baytex's request is not granted, taxes and royalties must be paid on flared gas which will increase operating costs, raise the economic limit and cause premature abandonment of the well; or the well must be connected to a gas pipeline or an electrical generator at an economic loss which would also cause premature abandonment, or flaring must cease and the well must be "capped," resulting in the loss of oil production and the loss of the benefits of that production by all owners of interest in the well and the State of North Dakota.

(13) In order to prevent waste, and protect correlative rights this application should be granted.

IT IS THEREFORE ORDERED:

(1) Baytex Energy USA Ltd., its assigns and successors, is hereby allowed to flare surplus casinghead gas produced with crude oil from the Burg-Bakken Pool through the well listed below under the exemption provided for under NDCC Section 38-08-06.4:

<u>File #</u>	<u>Well Name & Number</u>	<u>Location</u>
20587	Colby 23-14-160-99H #1PB	SWSE Section 23-T160N-R99W

(2) This order is effective as of December 14, 2012 and shall remain in full force and effect until further order of the Commission.

Dated this 18th day of July, 2016.

**OneOK Gas Gathering System
Project Summary/ Installation Timeline
Divide County, North Dakota**

April 4, 2012: OneOK announces plan to install \$160 MM/ 270 mile gas gathering system to service various operators in Divide County. Largest One OK project (to date) in North Dakota.

Current projections show final gathering system at **300+** miles, including 35 mile discharge pipeline. Baytex portion (laterals across leasehold) currently estimated at **120** miles.

Stateline 1 gas plant in service & Stateline 2 scheduled for start up by end of January 2013.

Samson Lines 1, 2 & 3 (to the north) scheduled for completion mid-January through March 2013.

Compressor Station scheduled to commence service mid-March 2013. Limited to two of three compressors until sub-station (electrical) upgrade completed by Burke-Divide in June 2013.

16" North trunk line expected in-service mid-January 2013; 12" steel discharge line complete. 14" (Crosby South) poly line scheduled to start construction February 2013. All Baytex laterals (except B11) will be staged upon construction start of Crosby South line.

Baytex Line 11 (27 miles) scheduled to start construction mid-January. Completion projected for **May- June 2013**. Will flow gas on all lateral lines (with block valves) as built-out.

Baytex Lines 7, 9 & 10 (26.6 miles) scheduled for projected completion by **October 2013**.

Southern laterals, particularly Baytex Line 6 (16.3 miles) are subject to route revisions due to ROW delays. US Fish & Wildlife habitat areas (waterfowl nesting) may have construction limitation in mid-April through mid-August timeframe. Anticipated completion dates will vary based on completion of right-of-way negotiations, weather conditions and equipment/materials.

Note: Refer to **Exhibit E7** for full details on all Baytex pipeline laterals

CONCLUSIONS AND RECOMMENDATIONS

CONCLUSIONS

- To date, Baytex has drilled and completed approximately 60 wells in the Ambrose, Blooming Prairie, Burg, Garnet, Musta, Smoky Butte, and Whiteaker Fields.
- The current average daily production of natural gas from those 60 wells is approximately 75 MCF per day.
- Currently there is no infrastructure to provide electricity to most of the Baytex operated wells in the Ambrose, Blooming Prairie, Burg, Garnet, Musta, Smoky Butte and Whiteaker Fields so Baytex utilizes natural gas produced from the wells to power gas engines for pumping units.
- After electrification of the Baytex wells in Divide County, the majority of produced natural gas will be available for sale.
- Currently there is no infrastructure to provide gathering and processing of the natural gas produced in association with oil from Baytex operate wells in the Ambrose, Blooming Prairie, Burg, Garnet, Musta, Smoky Butte, and Whiteaker Fields.
- Because of the lack of current infrastructure in the Ambrose, Blooming Prairie, Burg, Garnet, Musta, Smoky Butte and Whiteaker Fields, there is no market for the natural gas and it is being flared.
- Based on the gas gatherers' estimated construction schedule, Baytex anticipates its existing and future producing wells will be connected to OneOK's gas gathering system as follows:

1 st Quarter 2013:	0
2 nd Quarter 2013:	19
3 rd Quarter 2013:	37
4 th Quarter 2013:	13

- After completion of OneOK's gas gathering system in Divide County, there will be a market for the gas produced by Baytex in the Ambrose, Blooming Prairie, Burg, Garnet, Musta, Smoky Butte, and Whiteaker Fields which currently does not exist.
- After completion of OneOK's gas gathering system, future wells drilled in the vicinity of the gathering line will be connected in a relatively short period of time.
- Oil is valued at approximately 5 times that of natural gas and producing wells at maximum efficient rates will give working interest owners the opportunity to recoup capital investment and determine the viability of future drilling.
- Baytex has looked at numerous technologies to reduce flaring, *i.e.*, power generation through natural gas generators. However, due to the economic constraints of not having an available electric grid over the majority of Baytex's leasehold, these options have not been feasible.
- As handling of gas flaring cases has evolved, the use of single well and (now) field-wide orders has created a potentially confusing situation. To better manage these cases and to place the regulatory effort in line with the orderly (ongoing) infrastructure development, a more organized and comprehensive approach to gas flaring appears in order for Baytex's operations in Divide County.
- Baytex's ongoing infrastructure development efforts are in alignment with the NDIC's stated objectives and goals to reduce gas flaring to 10% of produced volumes (statewide) by the end of 2013.

RECOMMENDATIONS

The Commission should grant the requests of Baytex as follows:

- The field rules for the Smoky Butte-Bakken Pool, Blooming Prairie-Bakken Pool, Garnet-Bakken Pool, Musta-Bakken Pool, and Whiteaker-Bakken Pool, Divide County, ND, should be amended to allow the unrestricted production of oil and flaring of gas until the wells can be connected to a gas gathering facility.
- Because there is currently no market for the gas, flaring of gas from the following wells should be allowed as an exception to the provisions of NDCC § 38-08-06.4:

APPLICATION OF BAYTEX ENERGY USA LTD.

Baytex Energy USA Ltd. ("Baytex") for its application to the North Dakota Industrial Commission ("Commission"), respectfully states as follows:

1.

That Baytex is the owner of an interest in the oil and gas leasehold estate in portions of Section 23, Township 160 North, Range 99 West, Sections 3 and 4, Township 161 North, Range 98 West, Sections 3, 4, 5, 8, 10, 13, 14, 15, 18, 22, 23, and 24, Township 162 North, Range 99 West, and Section 34, Township 163 North, Range 99 West, Divide County, North Dakota, specifically and other lands in the same area.

2.

That such lands are currently within and around the areas defined by the Commission as the field boundaries for the Ambrose, Blooming Prairie, Burg, Garnet, Musta, Smoky Butte and Whiteaker-Bakken Pools.

3.

That Baytex is currently the operator of the Hall 3-161-8H well located in the SE/4SE/4 of Sec. 3-T161N-R98W and the Lindsey 4-161-98H well located in the SE/4SE/4 of Sec. 4-T161N-R98W, completed as producing wells in the Whiteaker-Bakken Pool, the Grundstad 10-162-99H well located in the NW/4NW/4 of Sec. 10-T162N-R99W, the Haugenoe 22-16-99H well located in the SE/4SW/4 of Sec. 15-T162N-R99W, the Larsen 8-162-99H well located in the NW/4NW/4 of Sec. 8-T162N-R99W, the Geralyn Marie 34-163-99H 1DQ well located in the NW/4NW/4 of Sec. 34-T163N-R99W, the Larson 3-162-99H well located in the SE/4SE/4 of Sec. 3-T162N-R99W, the Haugland 4-162-99H well located in the SE/4SE/4 of Sec. 4-T162N-R99W, the Haugland 9-162-99H well located in the SW/4SW/4

of Sec. 4-T162N-R99W, the Grundstad 5-162-99H well located in the SE/4SE/4 of Sec. 5-T162N-R99W, the Hansen 13-162-99H well located in the SE/4SE/4 of Sec. 13-T162N-R99W, the Sorenson 14-162-99H well located in the NW/4NW/4 of Sec. 14-T162N-R99W, the Haugenoe 15-162-99H well located in the NW/4NW/4 of Sec. 15-T162N-R99W, the Hansen 6-7-162-99H well located in the NE/4NE/4 of Sec. 18-T162N-R99W, the Hansen 18-19-162-99H well located in the NE/4NE/4 of Sec. 18-T162N-R99W, the Lystad 23-162-99 1QD well located in the SE/4SE/4 of Sec. 23-T162N-R99W, the Sinclair 24-162-99H well located in the NW/4NW/4 of Sec. 24-T162N-R99W, completed as producing wells in the Ambrose-Bakken Pool, and the Colby 23-14-160-99H 1PB well located in the SW/4SE/4 of Sec. 23-T160N-R99W, completed as a producing well in the Burg-Bakken Pool (“the Wells”).

4.

That the Wells are currently not connected to a gas gathering facility.

5.

That because of the location of the Wells and low volumes of gas produced from the Wells, it is economically infeasible to connect the Wells to a gas gathering facility at the present time, or in the foreseeable future and/or there is currently no market for the gas produced from the Wells.

6.

That gas produced in association with oil produced from the Wells is currently being flared.

7.

That Baytex may drill additional wells in the Blooming Prairie-Bakken Pool, Garnet-Bakken Pool, Musta-Bakken Pool, Smoky Butte-Bakken Pool, and Whiteaker-Bakken Pool for which there will likely be no market for the gas.

8.

Christmas and New Year's Holiday Schedule

Tuesday route will run on Wednesday
Wednesday route will run on Thursday
Thursday route will run on Friday
Friday route will run on Saturday

Thank You and Merry Christmas

We are so fortunate to have health care services available to us.

ST. LUKE'S HOSPITAL is there 24/7 for our emergency and medical needs.

CROSBY CLINICS meets our daily medical needs in two locations—Crosby and Lignite.

NORTHERN LIGHTS VILLA assists our seniors in maintaining a healthy, independent lifestyle.

Our donors make it possible for the community to provide these services and we thank you!

Like other rural hospitals providing a community service, St. Luke's Hospital & Clinics depends on the generosity of its donors. Every gift is important and we appreciate your active participation in this good work through your generous financial support.

We hope you will continue to support us with your financial gifts to help us add nursing home care under our umbrella of community services. It would be the best Christmas gift ever!

The Good Samaritan Society has offered to donate Crosby's Good Samaritan Center to St. Luke's Hospital as soon as February 2013. Merging the facilities will retain nursing home beds in the community and it will generate revenue for St. Luke's Hospital. This is truly a wonderful gift to the community. St. Luke's is in need of your financial support to garner the necessary start-up costs to be in a position to accept this generous gift. Lending your financial support to provide our seniors with close to home nursing home options would be... priceless.

THANK YOU FOR ALL YOU DO FOR ST. LUKE'S AND THE BURKE/DIVIDE COUNTY COMMUNITY.
